

Dan Schoner

Technical Consultant

LCI's Dan Schoner has been in the computer technical support arena for over thirty years, working with IBM mainframes, Unix-based supercomputers, computer-controlled robotics, Solaris® / Windows® - based workstations & servers, neurological research, real estate and network-attached storage applications. A self-described jack of all trades with a concierge attitude, Dan does not believe in the word "can't". With over 750,000 air miles as a technical support engineer Dan has supported clients and applications worldwide. Dan brings an understanding of the big picture with an intense focus on the details.

Dan has extensive experience in computer peripherals to include tape, disk, and printers; central processing units – IBM 360, 370, 303X, Convex C-1, C-2, and C-3 series, Fujitsu PrimePower; operating systems – MVS, BSD/SystemV Unix, DOS, OS2, Solaris, Linux, and all flavors of Windows at the desk level; LAN setup and CAT-5 cabling. Application level support of real estate, neurological, database, Microsoft Office, and data storage replication / virtualization software packages. In his spare time Dan enjoys golf, fishing, home networking, and of course fixing anything that doesn't work to his satisfaction.
