

Donna Bruer

Logistics Coordinator

Donna comes to LCI with a varied and extensive background in the banking industry, ranging from overseeing complex, multi-million dollar portfolios to serving in a supervisory capacity. She began in residential lending, spending ten years managing credit portfolios while developing ongoing customer relationships.

She also supervised ten employees who served as a support staff to a department of thirty. She then spent five years serving as a systems analyst in the IT department, assisting programmers in the development of computer services that became the lifeblood of the bank. She was instrumental in the development of a multi-faceted computer system used for tracking every aspect of interim construction loans. The system, eventually adapted by a variety of home builders for use in their offices, helped the bank cultivate business from leading builders nationally, allowing the bank to double their portfolio within a year. Her job requirements entailed traveling from Texas to both Florida and California during bank acquisitions to implement major system conversions while also overseeing user software training.

Beyond her banking experience, Donna has operated her own small business for the past five years. She is highly motivated, energetic and conscientious, in addition to being organized, detail oriented and able to work well under pressure.
